

Fabric Softener

Article No. 6696 (946 mL/32 fl. oz.)

Watkins Fabric Softener is a super-concentrated anti-static fabric softening liquid designed to be added to the rinse water of your automatic washer. It will leave your clothes smelling fresh and clean while helping them to be their whitest and brightest, and softest.

Why Watkins?

- **Versatile:** Reduces static cling on freshly-washed clothes; reduces the need for ironing.
- **Special softening agents:** Give clothing and towels a softer, more pleasant feel.
- **Concentrated:** Economical; a little bit goes a long way.
- **Sunshine-fresh fragrance:** A mild and pleasing scent.
- **Non-yellowing formula.**

Use with Dispenser Pump (Article No. 6271) for pre-measured dispensing with no mess.

Laundry Tip

Replace dryer sheets and save money! Just take an old washcloth, dedicated for this purpose, pour a small amount of Watkins Fabric Softener on it and toss it in the dryer. It will leave clothes soft, static-free and fresh smelling without the waste!

Product Demonstration

At home, wash two identical washcloths in two separate wash loads of laundry. In the first load, add Watkins Fabric Softener according to label directions. Do not use the Fabric Softener in the second load. Compare the two washcloths after drying. The first will be noticeably softer and free of static cling.
