

Pre-Wash Stain Remover

Article No. 6698 (946 mL/32 fl. oz.)

Watkins Pre-Wash Stain Remover contains surfactants and organic solvents designed for pre-treatment of soiled areas on all colorfast washables. An excellent product for new parents—tough stains on babies' clothes, bibs and other items are no match for this effective formula.

Why Watkins?

- **Versatile:** Use in hot or cold water; may be used on all colorfast washables and permanent press items.
- **Effective:** Removes stubborn dirt, grease and stains that even the best detergents can't.

Essential Ingredients

- **Specially designed surfactant system:** For removal of difficult soil types and oil stains.
- **Organic solvents:** Especially effective in removing oil, grease, and other organic stains; excellent general spot remover.
- **Chelating agents:** Helps condition wash water to assist the surfactants in removing stains; helps remove discoloration due to hard water.
- **Phosphates:** Condition and soften wash water by tying up and holding hard water minerals in solution; helps emulsification of soils and stains. (Although phosphates can harm lakes and streams by promoting growth of vegetation, the use level of this product is so low that environmental impact is minimal.)

Directions

Saturate stained area and wait one or two minutes before washing as normal.

Trigger Sprayer (Article No. 6259) adds to Pre-Wash's convenience by letting you target delivery of product accurately, using less, and with no mess.
